## Step 2: Configuration

Op deze pagina kan je instellen of de energiemeter resetten. De energiemeter toont het totale energieverbruik sinds de inschakeling. Je kan deze teller eventueel resetten op deze pagina.

The screenshot shows a web browser window titled "Innovoltus NUO configuration" with the URL "192.168.4.1". The page has a navigation bar with tabs for "NUO", "Status", and "Config". The main content area is titled "Configuration" and contains two sections:

- Step 1: Wireless**: Contains a "Fallback when connection is lost" section with a switch labeled "1 On" (which is selected) and "Off".
- Step 2: Configuration**: Contains a "Reset the energy meter to zero" section with a red button labeled "2 Reset".

Below these sections is a "Firmware update" section with a note to "Select a binary file (.bin) to use for the firmware update.", a file selection input field showing "Geen bestand gekozen", and a "Upload Firmware" button. A progress bar is shown below the upload button.
